

# PLOTSAYER SUPPLY CALCULATOR

## PERIMETER VS. AREA

The blocks pictured here demonstrate how supplies are determined. Notice that a two acre plot does NOT require twice as much material as a one acre plot, since the center line does not need to be protected.

The area of the two acre plot is twice as large while the perimeter is only one and a half times as large!

REMEMBER: ALWAYS MEASURE YOUR PLOT BEFORE ORDERING SUPPLIES.

1 acre  
44,100 sq.ft.  
840 linear feet

2 acres  
88,200 sq.ft.  
1,260 linear feet
